

FAASTeam Flight Instructor Open Forum

Aviation has come a long way since the Wright brothers first flew at Kitty Hawk, but two things that continue to contribute to fatal accidents are flying into adverse weather and maintenance problems. At this Instructor Open Forum, we will first discuss teaching students to develop skills in obtaining appropriate weather information, applying the information and analysis to make safe weather flying decisions. Secondly we will be discussing what instructors should know about Owner/ Operator Preventive Maintenance and determining airworthiness as an Instructor. Please come and join in the discussions!!! Click on the link below and register TODAY!

Directions: Go to Suite 111 on first floor, office is on the North side of the building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
